S.5	Incentive Mechanisms and	A Proof-of-Work (PoW) consensus mechanism		
	Applicable Fees	incentivizes miners to secure the network by		
		publishing updates to the ledger in the form of		
		blocks, containing newly submitted and verified		
		transactions. Miners compete to solve cryptographic puzzles, and the first to succeed		
		earns newly minted crypto-assets (block		
		reward) and user-paid transaction fees.		
		Misconduct, such as attempting to add invalid		
		blocks or rewrite the history of the ledger,		
		results in wasted computational resources and		
		opportunity costs, creating an economic penalty		
		that discourages dishonest behavior.
